Full-Stack Engineer specializing in React, TypeScript, Node.js | Scalable Systems

EXPERIENCE

Software Developer — Identity

Full-time - Jan 2025 - Present

- Designed and built a decentralized Self-Sovereign Identity (SSI) platform for issuing and verifying verifiable credentials.
- Developed secure and scalable backend services using TypeScript and Node.js with strong focus on reliability and performance.
- Implemented a cloud-based SSI agent using the Credo ecosystem and Indy-based blockchains for interoperability and trust.
- Customized and extended a React Native wallet to support advanced credential workflows and improved UX.
- Built internal web applications (React + TypeScript) including issuer dashboards and admin panels.
- Integrated decentralized identity standards and protocols across SSI ecosystems.
- Contributed to system architecture and product design for real-world identity use cases.
- Improved maintainability through modular architecture and well-tested, clean code.

Frontend Web Developer — Dalmore Group

Contract - Sep 2024 - Feb 2025

- Owned the frontend architecture and implementation for a production platform.
- Delivered a pixel perfect UI by converting Figma designs into production ready code.
- Built scalable, reusable components to support rapid feature development
- Integrated and handled multiple API endpoints, including error states and edge cases
- Maintained high development velocity while meeting strict delivery timelines
- Proactively Improved UX, performance and code quality across the application lifecycle

Frontend Web Developer — Enterprise League; Remote

Contract - Sep 2024-Dec 2024

- Improved SEO performance and frontend performance across production applications.
- Collaborated with designers to deliver UI/UX enhancements.
- Built modular, reusable frontend components using modern best practices.
- Debugged and resolved performance bottlenecks.
- Integrated APIs ensuring reliable frontend-backend data flow.

Full Stack Developer — Perion (via Sourcico); Skopje, North Macedonia

Full-time - Jun 2022-Aug 2024

- Developed and maintained large-scale enterprise web applications.
- Collaborated closely with designers to build intuitive interfaces using React and TypeScript.
- Built backend services with Node.js (Express), including models, migrations, and REST APIs.
- Identified and resolved performance bottlenecks and production issues.
- Maintained high code quality using industry best practices.

EDUCATION

Semos Computer Education Center — JavaScript Academy (MERN Stack), 2022

Ss. Cyril and Methodius University of Skopje — Bachelor's Degree, Vegetable Crop Science, 2016

SKILLS

- Languages: JavaScript, TypeScript
- Frontend: React, Next.js, Tailwind CSS, Shadcn UI
- Backend: Node.js, NestJS, RESTful APIs, Microservices
- Databases: PostgreSQL, MySQL, MongoDB
- Engineering: Accessibility, API Design, System Design, Web Performance
